ELECTRONICS

CLIENT

Leading global electronics
&
manufacturing company

GEOGRAPHIES
COVERED

UAE - ABU DHABI/ AL AIN (30%),
DUBAI (40%) & SHARJAH (30%)

METHODOLOGY
ADOPTED

**Qualitative
+
Quantitative**

STUDY BACKGROUND

- Our client indicated a gap in understanding the consumer perspective w.r.t the current refrigerator market. Although it has information at the macro level, it has identified the need to understand the consumer preferences, requirements as well as motivators and barriers to purchase of refrigerators.
- The client was keen to get a perspective of the estimated potential which would help develop strategic plans to become the market leader. As per our understanding, our client was launching a new line up of refrigerators and would be developing a communication strategy highlighting the USP of the brand to attract consumers to the brand.

BUSINESS OBJECTIVE

- The insights garnered from the study would help the brand develop its strategic plans.
- Results are also envisaged to help develop communication strategy highlighting the brand USP to attain market leadership position.

RESEARCH OBJECTIVE

- To gauge the consumer needs and understand preferences w.r.t refrigerators
- To understand the functional and emotional relationship with the refrigerators
- To test the communication in ATL campaigns

SAMPLE SIZE

6 in-depth ethnographies
500 Online+F2F interviews

TIMELINE

8 weeks

TARGET
RESPONDENT

- Females
- Intender - People who have started the consideration phase. This will lend good insight to their purchase decision process, what attributes, features and benefits are most important to them.
- Recent buyer - These people will still be evaluating their recent purchase. They will be satisfied with some aspects of their new fridge, delighted with some new features and grappling and adjusting to it's faults. This makes these people excellent respondents as fridge life will be very top of mind.

EXECUTIVE SUMMARY

- Ownership of refrigerators stand at 2-3 /household located in the kitchen area
- Multiple brands owned by the households
- Drivers include space, extra storage, design, and utility
- Additional functions are an advantage but not necessity
- High satisfaction with the current brands
- Lower intention to buy in the next 6 months among those who own more than 2 refrigerators
