STUDY BACKGROUND

Personal grooming is essential for maintaining a neat and well-groomed appearance. With increasing awareness around hygiene, professional looks, and social acceptance, a leading global analytics company partnered with Markelytics to conduct a market survey evaluating consumer personal grooming patterns, specifically focusing on their choice of razors and shavers. The study aimed to understand consumer preferences, optimal price points, drivers for switching, and mediums of awareness.

- The fieldwork was conducted over a month, covering various major cities across India from June to July 2024.
- The survey was carried out using a face-to-face methodology.
- Respondents were from two major segments: upscale neighbourhoods and mass-segment neighbourhoods.

SAMPLE SIZE
Over 500
Samples

Fieldwork was
conducted from
June to July 2024

TIMELINE

TARGET
RESPONDENT

- Users of Razors or Shavers with any blades/Cartridges – Double Edge Razor, Cartridge Razor, Electric Razor, Disposable Razor, Straight Razor
- Should have bought a Razor/Shaver in the past 1 month
- Male: Female Ratio – 70:30
- Age 18+ belonging to NCCS A, B, C

RESEARCH OBJECTIVE

- Consumer Profiling
- Consumer habits and perceptions
- Gender-wise awareness and usage patterns
- Price Sensitivity Analysis

EXECUTIVE SUMMARY

- **Our Understanding of Consumer Preferences:** Markelytics conducted a market survey on consumer personal grooming patterns, focusing on razors & shavers. The study aimed to understand consumer preferences, optimal price points, drivers for switching, and awareness channels.
- **Consumer Engagement:** While cartridge and double-edged razors are mostly preferred, straight and electric razors received the least preference from respondents. Promotional awareness for these should be increased.
- **Grooming Priorities: Males vs. Females:** For males, emphasis should be placed on parameters like a clean look and hygiene, while for females, the after-shave experience should be prioritized, followed by brand reputation and ease of use.
- **Brand Boost:** Cross-promotion of shaving gels/soaps and investment in TV ads and shopping experiences are key strategies the brand can adopt to increase its global footprint.
- **Overall Strategies:** Aggressive subscription plans for brand loyalty, online promotion via various platforms, and functional product upgrades should be included.
