STUDY BACKGROUND

The study was conducted in the European & Asian markets. When the study went live the response rate in all countries was good, and the client was satisfied with the outcome that came during the regular sample, as the coffee drinkers' percentage was according to the market for both European and Asian regions.

BUSINESS OBJECTIVE

To understand brand salience in the coffee market.

RESEARCH OBJECTIVE

To understand coffee consumption habits in different parts of the world and among different ethnicities.

2.5 weeks

TIMELINE

TARGET RESPONDENT

- (I) For Regular Sample the Target groups were Gen Pop 18+ but here the Incidence Rate was 100%
- (II) For Over Sample as well it was Gen pop 18+ but here the Incidence Rate was 40% since we had to catch respondents who had consumed coffee over the past 12 months.

SAMPLE SIZE

Europe

UK Regular Sample - 300
UK Over Sample - 81
France Regular Sample - 300
France Over Sample - 62
Germany Regular Sample - 300
Germany Over Sample - 64
Spain Regular Sample - 300
Spain Over Sample - 89

Asia

China Regular Sample - 500
China Over Sample - 168
South Korea Regular Sample - 500
South Korea Over Sample - 14
Japan Regular Sample - 500
Japan Over Sample - 72

OPERATIONAL CHALLENGES

The study progressed smoothly for all the markets except in China. The partner in China was unable to deliver the completes in the younger age group and we struggled to get the completes back in line as per the client's expectations.

OUR APPROACH TO OPERATIONAL CHALLENGES

After analyzing the situation in China market, we had a word with our partner, post which we had to go back to the client to seek relaxation in the other age group and achieve the required completion for the study. After seeing the response rate and completion rate, the client agreed upon the lines of relaxation and we were able to close the study on a good note.
