CLIENT
**A country's
Judicial
Department**

GEOGRAPHIES COVERED

**Middle East
Northern Ireland
Singapore**

METHODOLOGY ADOPTED

- Visit
- Telephonic
- Web-based

STUDY BACKGROUND

To evaluate the services offered by the Judicial department using Mystery shoppers

BUSINESS OBJECTIVE

Improve the facilities and experience of the users of the Judicial system

SAMPLE SIZE

- Visit (20)
- Telephonic (20)
- Web-based (20)

KEY OUTCOMES

- The study indicates that the overall satisfaction with the services offered by our client is significantly better (82%) than that of the Northern Ireland (76%) and Singapore (62%).
- Interactions with our client in P12M are more frequent amongst the surveyed audience. In contrast, those in Northern Ireland and Singapore have interacted less often with their respective judicial departments' in P12M (in past 12 months).
- The customers of our client are observed to reply more on personal visits to the judicial department. However, interestingly it is the telephone and websites that are popular in Northern Ireland and Singapore (online interaction being more popular in Singapore than other modes).
- It is extremely important that users of our client services are made aware of the various services that can be used;
 - a) Using the call centre facility and
 - b) Through the website.This will help our client offer its services with greater efficiency to the customers.
