METHODOLOGY
ADOPTED

We have
conducted
Quantitative
Face-to-Face
(F2F) Interviews.

STUDY BACKGROUND

With the advent of numerous players in the past few years, real estate & property development has become a promising business venture. In this scenario, the Client wished to map consumer perceptions, brand image, and values associated with the major players in the market.

SAMPLE SIZE

30 structured interviews were conducted and focused on awareness of real estate properties/builders, considerations for the property, and recommendations for the same.

BUSINESS OBJECTIVE

To understand the brand positioning of different real estate brands among the HNIs, who are intending to purchase property in certain particular posh areas of Mumbai or are currently residing in those posh areas.

OPERATIONAL CHALLENGES

The study was a challenge in terms of identifying a suitable target respondents, getting an appointment and convincing them to take the interview.

OUR APPROACH TO OPERATIONAL CHALLENGES

We conducted exit interviews outside jewelry stores and up-market malls. We also resorted to snowballing contacts which helped us to find the right set of respondents.

CLIENT FEEDBACK

The study was helpful to understand the perceptions of people towards different brands and the key selling points of property builders in the market. The insights gained from the research helped the client to formulate the pricing and marketing strategy.
