METHODOLOGY
ADOPTED

Adopted Computer Assisted Telephone Interviewing (CATI)/ Computer Assisted Web Interviewing (CAM) In this process a particular respondent was contacted over the phone and he/she was informed about the details of the study. They were then instructed to continue their interview online.

STUDY BACKGROUND

The purpose of this study was to look into various dental products available in market, their usage and the patients' preference for one product over the other.

SAMPLE SIZE
109 dental professionals

ONLINE APPROACH

In this process a set of email invitations were rolled out to those who were using our in-house software. In this invitation a brief of the study along with the study link to participate was given.

OUR APPROACH TO OPERATIONAL CHALLENGES

Slow participation rate as the study period was at the end of the year which was a festive/holiday period.

EXECUTIVE SUMMARY

The client was satisfied with the overall result achieved.
