STUDY BACKGROUND

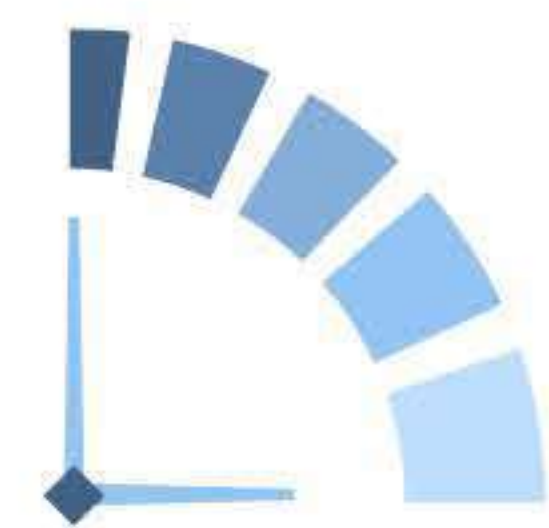

A media and entertainment company approached Markelytics to conduct a weekly online tracker of 8 weeks for one of their reality shows.

RESEARCH OBJECTIVE

- To capture awareness of various elements in terms of trailer/promo, show, platform.
- To measure the show viewership and delve into reasons for likes/dislikes of the show.

SAMPLE SIZE

1600

TIMELINE

8 weeks

TARGET
RESPONDENT
Active OTT users

METHODOLOGY ADOPTED

Online quantitative survey using Markelytics proprietary panel.

SERVICES OFFERED BY MARKELYTICS

End to end market research service.

EXECUTIVE SUMMARY

- It was found during the survey that viewership was moderate for all the weeks, but it was higher than usual for the 5th and 8th week.
- The awareness level for the show was found higher in metro cities, specifically among the young audience. One of the probable reasons for that was found to be they being a regular viewer of the show.
- The misattribution for the viewing avenue of the show was highest among small town viewers.
- It was found that more than half of the viewers have watched all the episodes and aware of the unique features available in the platform.
