STUDY BACKGROUND

In the fast-paced world of media consumption, understanding viewer preferences is crucial for any media company. This case study delves into a meticulous online market research study conducted for a prominent media company during the Indian Premier League (IPL), aiming to track viewership trends and decipher the dynamic landscape of its audience.

RESEARCH OBJECTIVE

- The primary objectives of the study were to:
- Track viewership trends during the IPL season.
 - Gather insights on viewer demographics (Gender, Age Bands, and NCCS).
 - Categorize viewers into IPL fandom categories (Core Fans, Casual Fans, and Regular Fans).
 - Explore viewer preferences across content mediums (Cord Lovers, Cord Cutters, and Cord Stackers).

TIMELINE

14 weeks

SAMPLE SIZE

11,200

TARGET RESPONDENT

Demographics Breakdown:

1. Gender Distribution: Monitored and reported the viewership trends based on gender (Male vs. Female)
2. Age Bands: Segmented the audience into age bands (15-21, 22-30, 31-40, 40+)
3. NCCS (SEC in some regions): Categorized viewers based on the NCCS classification (A & B)
4. IPL Viewership Segmentation:
 - Core Fans: Dedicated followers with a deep connection to IPL teams
 - Casual Fans: Occasional viewers with sporadic interest
 - Regular Fans: Consistent viewers with moderate engagement
5. Content Mediums Analysis:
 - Cord Lovers: Traditional TV viewers who prefer cable or satellite connections
 - Cord Cutters: Viewers relying solely on digital platforms without traditional TV subscriptions
 - Cord Stackers: Individuals combining traditional TV and digital platforms for content consumption

METHODOLOGY ADOPTED

- **Sample Size:** 11,200 respondents over 14 weeks.
- **Quotas:** Soft quotas on Gender, Age Bands, NCCS, IPL Viewership, and Content Mediums.
- **Daily Tracking:** Continuous data collection for 14 weeks.
- **Market Weights:** Applied market-wise weights based on TV and Digital viewership sourced from the client.

MARKET-WISE ANALYSIS

1. We conducted an in-depth analysis across different markets, identifying regional variations in viewership patterns
2. Examined factors contributing to regional preferences and disparities

DATA REPORTING

1. Provided comprehensive daily reports to the client
2. We presented findings structured, focusing on the specified cuts (Markets, IPL Viewership, Content Mediums, and Age Bands)

INSIGHTS AND RECOMMENDATIONS

1. We identified key trends, such as age-specific content preferences and changing viewership patterns across different markets
2. They offered actionable recommendations to the client for content optimisation and targeted marketing

IMPACT AND FUTURE IMPLICATIONS

1. The insights gained from this study empowered the media company to tailor content strategies, improving engagement and relevance
2. The data collected lays the foundation for future research and strategic planning

EXECUTIVE SUMMARY

This case study exemplifies the power of detailed market research in decoding viewer dynamics during a high-profile event like the IPL. The nuanced approach to segmentation and continuous tracking has provided the media company with valuable insights, enhancing their understanding of their audience and enabling strategic decision-making for future endeavors
