Taiwan, Indonesia
and Kazakhstan**

MRTBDM020124

STUDY BACKGROUND

The Client wanted to understand the traditional markets of tobacco, the technological shift, cultural shift, the regulatory norms by the government or any independent body and the consumption habit and pattern in different markets. In that regards the Client approached Markelytics.

BUSINESS OBJECTIVE

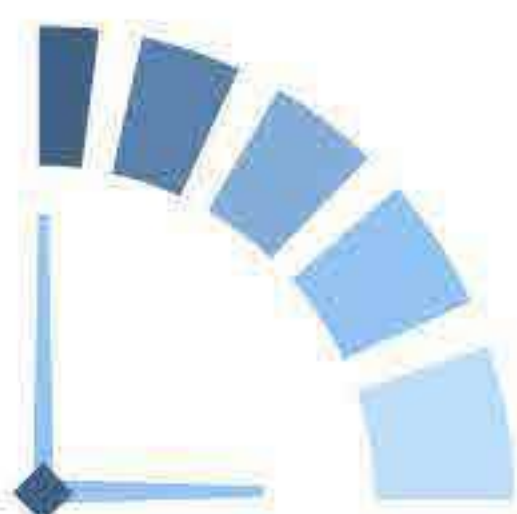

To develop a business plan to enter, expand and get a foothold in the tobacco category among the countries of interest.

METHODOLOGY ADOPTED

Qualitative and Quantitative – both online & offline

SAMPLE SIZE

1000 each from all 5 countries &
additional 200 brand specific

TIMELINE

**6-7
weeks**

RESEARCH OBJECTIVE

- To develop research protocols, and conduct research projects with different research designs
- To analyze and assess competitors in the countries of interest with respect to product offerings and sales
- To collate data from different sources (secondary and primary research) and propose solutions to support the client for their business plan

TARGET RESPONDENT

**Cigarette users (should have bought/
smoked cigarettes in the latest months
and should be the decision maker on the
brand of cigarettes)**

EXECUTIVE SUMMARY

- In all the countries, the proportion of male smokers is overwhelmingly high (over 75% of the total)
- Indonesia, Taiwan and Mongolia have a high proportion of young smokers aged between 20-30 years, while in Russia and Kazakhstan, the proportion of smokers is more in the age group 40 and above
- The average daily smoking volume in Indonesia and Mongolia is somewhat between 12-13 cigarettes and that for Taiwan, Russia and Kazakhstan is 16
- The main markets of cigarettes were found to be Indonesia, Taiwan and Mongolia while Russia and Kazakhstan are early markets for entering and growing the category of cigarettes & HNB
